[Summary]

In the month under review, net sales at existing stores (total) were 102.5% and those of all stores (total) were 102.9 %, respectively, compared with the same month of the previous year.

As temperatures trended higher than normal throughout the month, sales of mid-summer clothing such as shirts, knitwear and others made of functional materials including cool touch fabric performed well. In particular, e-commerce sales of full-price items expanded. At Onward Personal Style, which operates the made-to-order brand "KASHIYAMA," sales continued to increase.

Due to the fact that there were two fewer holidays during the month than in the same month of the previous year, we estimate that this had a negative impact of 8.4pt on store net sales at existing stores and 6.6pt on net sales at existing stores (total). As there were two more holidays in the previous month (June) than the same month of the previous year, net sales at existing stores (physical stores) and net sales at existing stores (total) for June and July combined were 105.9% and 106.5%, respectively, compared with the same months of the previous year.
